Art Unit: 2831

#### **DETAILED ACTION**

## Claim Rejections - 35 USC § 103

- 1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 2. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).
- 3. Claims 1-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Leuchs et al. (4,297,526) in view of Thomas (5,538,294).

Art Unit: 2831

Leuchs et al. (Figure 1) discloses a single electrical conducting cable comprising a conductive core (1), a single gas impermeable sheath (2) comprising an oxidation resistant alloy and having an inner surface and an outer surface. Leuchs et al. does not disclose the cable comprising a solid one-piece terminal lugs at each end nor the outer surface of the sheath being hermetically sealed using a heat resistant braze to the lugs. Leuchs et al. also discloses the sheath comprising a corrugated metal resistant to oxidation. Thomas (Figure 2) discloses a sheath (24) having solid one-piece terminal lugs at each end, wherein the outer surface of the sheath is hermetically sealed to each of the lugs (30). It would have been obvious to one skilled in the art to provide a terminal lug as taught by Thomas at each end of the Leuchs et al. sheath to provide connection means for the cable. It would have been obvious to one skilled in the art to use oxidation resistant alloy for the terminal lugs (of Thomas) in the modified cable of Leuchs et al. to prolong the cable life since oxidation resistant alloy is well-known in the art for being used as terminal lug material. It would also have been obvious to one skilled in the art to use a heat resistant braze to seal the sheath of Leuchs et al. to the terminal lugs of Thomas to further secure the sheath to the lugs since using a heat resistant braze for mechanically and electrically securing two elements is well-known in the art. It would have been obvious to one skilled in the art to use copper for the

Art Unit: 2831

conductive core of Leuchs et al. since copper is well-known in the art for its highly conductivity. Leuchs et al. discloses the sheath comprising steel but not stainless steel. However, it would have been obvious to one skilled in the art to use stainless steel for the sheath of Leuchs et al. since stainless steel is well-known in the art for its corrosion resistant properties.

### Response to Arguments

4. Applicant's arguments with respect to claims 1 and 6 have been considered but are most in view of the new ground(s) of rejection.

#### Summary

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire

THREE MONTHS from the mailing date of this action. In the event a first reply is

filed within TWO MONTHS of the mailing date of this final action and the

advisory action is not mailed until after the end of the THREE-MONTH shortened

Art Unit: 2831

statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

#### **Contact Information**

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Chau N. Nguyen whose telephone number is 571-272-1980. The examiner can normally be reached on Mon-Fri.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Dean Reichard can be reached on 571-272-2800 ext 31. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
